The George bill thus proposed that the District's tax-burden should be 100 by 1=100 instead of 66% by 1½=100. The House District committee says that the assessment may be increased at pleasure, but the rate must not be decreased, and thus fixes the minimum local tax-burden at 100 by 1½=150, or an increase of 50 per cent over the present burden and that proposed by the George bill.

The District will not object to the statement of its tax-burden in the George terms of Tweedle-

Full valuation for assessment means full and true valuation for sale nowhere in the United States. Reports to the census of a 100 per cent assessment valuation, if construed to mean 100 per cent valuation between buyer and seller, are false and misleading. Failure to appreciate this fact is all that has prevented quick and full recognition of the gross overassessment of Washington reality in comparison with that of other cities. The same failure is responsible for the determined efforts to raise Washington's assessment basis.

Except in a few cities of the states
of Minnesota, Washington and Wisconsin the census-reported relations of

worthless as a measure of the com-parative actual tax-burdens. The cen-sus authorities make clear the unre-liability of these statistics and of the inferences and deductions from them.
The only reliable measure of com-parative tax-burdens is the per capita tax-levy.

It the taxpayers of a community have absolute control of the tax-rate, and that rate is flexible and easily and quickly altered, it is entirely immaterial, so far as the community is concerned, whether the assessment is at nominal full valuation, or two-thirds, or one-half, or one-quarter valuation, provided this basis is applied with absolute uniformity to all property. The tax-rate goes up or down in inverse ratio to the assessment to produce the amount of money required to meet the municipal expenses. Under these conditions the nominal 100 per cent valuation is the simplest, since it must first be ascertained before the fractional bases can be calculated.

> The recommendations are substantialraising the rate of interest permitted on loans from 1 to 11/2 per cent a month

Convinced of Mistake.

The citizens' loan committee, of which nember, endeavored at the time the 'loan have a 2 per cent interest provision inserted, but Congress decided that 1 per

serted, but Congress decided that 1 per cent was enough. The committee is now more convinced than ever that this was a mistake, but takes the position that the loan companies may be able to do business on a 1½ per cent basis.

The amendments submitted, with the Commissioners' statements embodying the reasons for them, are as follows:

"1. Amend section 1 by adding after the word 'intangible,' in line six, the words 'or without any security.'

The reason for proposing this amendment is that in a recent prosecution it was contended on behalf of the defendant that the law did not apply to those cases of loans made without collateral security and that the mere promissory note of the borrower was not a security within the meaning of the law. The Court of Appeals of the District has recently rejected this contention, but it is nevertheless considered desirable that all doubt be removed by the adoption of the proposed amendment.

means an increase of that burden by fifty or one hundred per cent, then Washington respectfully but firmly insists upon its desire to retain Tweedledee.

Since the George bill, as it is now explained, proposed only an equitable readjustment and not an increase of District taxation, the full valuation and rate unsettlewith a due observance of the law, or to discourage fair competition in the busi-ness, but it is believed that this high license tax has both effects.

Proposed Amendment.

". Further amend section 1 by adding at the end thereof the following: When an application for a loan i made within the District of Columbia and the money is advanced without said District in consequence, directly or indirectly, of such application, the transaction shall be deemed a loan made withi such District, and all the parties within said District aiding and making it shall said District aiding and making it shall be subject to the provisions of this act.

"The buying or indorsing of a note or notes, or the furnishing of guarantee or security for compensation, shall be considered to be engaging in the business of loaning money within the provisions of this act. Any person, firm, voluntary association, joint stock company, incorporated society or corporation, directly or indirectly engaged, or seeking to engage in the business of negotiatrectly or indirectly engaged, or seeking to engage in the business of negotiating, arranging or aiding the borrower or lender in procuring or making loans, whether such loans are actually made by such person firm, voluntary association, joint stock company, incorporated society or corporation, or by other parties, or are not made, shall be deemed to be engaged in the business of making loans, and shall be subject to the provisions of this act.

Subject of Provision.

"The object of this proposed amend ment is to further strengthen the law and to reach those persons who may at-tempt its evasion, as there is reason for believing has already been undertaker with more or less success. This amendment has been framed with considerable care, and proposes, it is believed, to introduce into the law correct principles.

"5. Amend section 5 by adding after the word 'one,' where it first occurs in said scetion, the words 'and one-half.'
"The object of this amendment is to in-crease the rate of interest that may be crease the rate of interest that may be charged by those engaged in the business regulated by the law to 1½ per cent interest per month, instead of 1 per cent. This proposed increased rate is ½ of 1 per cent less per month than that proposed in the law as originally submitted to the Congress, and the Commissioners realize that in its passage through the Congress this question of the rate of interest was one that received the warmest discussion.

No Profit in Business.
